

## QU'APPELLE PROGRESS.

Thursday, November 5, 1896.

## THE NEWS OF THE DAY.

CONDENSED FOR BUSY PEOPLE.

Short and Interesting Paragraphs that Treat of Men and Things in a General Way.

Evangelist Crossley's father is dead, aged 85.

Canadian hay is realizing good prices in England.

Premier Laurier will not go to England this fall.

There were forty-eight failures in Canada last week.

A quantity of contraband whiskey from St. Pierre de Miquelon was seized at Dalhousie.

The report that Sir Oliver Mowat is to be the next Lieut.-Governor of Ontario is flatly denied.

The old wheat standards have been restored on the representations of the farmers.

The Niagara Falls suicide has been identified as a moulder named Feirich, out of employment.

Wiseacre see in the rise in the price of wheat a great chance for Canada to promote immigration.

Three firemen were killed and several seriously injured by the collapse of a burning building at Montreal.

The Behring sea commissioners who were enquiring into the conditions of seal life have returned to Ottawa.

Wm. Maynard, of Orillia, is missing. It is supposed he has been drowned on the water near Strawberry Island.

Location 94 S, on Shoal Lake, has been sold by Dr. Edmondson, of Rat Portage, to eastern capitalists for \$25,000, cash.

Fifteen employees of the Dominion agricultural department and forty of the public works staff have been dismissed.

Professors Goldwin Smith, London, Peterson and Cayen have been honored with degrees by Princeton College, New Jersey.

Hereafter, when people decline to accept papers mailed to them free, the cost of postage will be charged to publishers.

Remored that speaker Young will enter the Manitoba cabinet as provincial secretary and that Myers will be made speaker.

The Primate of All Canada and the Bishop of Qu'Appelle assisted at the dedication of the new Anglican college at Montreal.

The minister of fisheries has granted permission to the Cape Vincent, New York, hatchery to take whitefish spawn in our waters.

Nearly the whole of the season's lumber cut at the Ottawa mills, amounting to 100,000,000 feet, has been bought by English dealers.

The three greatest nickel locations in the Sudbury district, known as Leveac group, have been sold for the substantial price of \$250,000.

Condie, the assistant agent of the C. P. R. at Oak Lake, who decamped with over \$3,000 has been arrested and is now in jail awaiting trial.

A train on the Canadian and Eastern railway was struck by a landslide while passing Marysville, N. B., and now lies bottom side up by the Nashua river.

Joseph Tait, ex M. P. P., is named as likely to be successor to J. Gordon Brown, as registrar of the surrogate court. The position is worth about \$3,000.

Mr. Sanford Fleming and Mr. A. G. Jones, of Halifax, are to be associated with Sir Donald Smith, as Canada's commissioners at the Pacific conference.

The postoffice will put a stop to private post cards, which often contain advertising matter on the address side; no cuts or devices must appear on the front of the card.

The Indian, Bad-young man, who killed another Indian and who attempted to kill McNeill, near Macleod, and murdered his mother and sister, has been arrested after a great struggle.

At the annual meeting of the Toronto Gas company, held in Toronto a few days ago, Manager Pearson stated that although the price had been reduced to 90c, still the annual profits were not far behind those of last year.

The Newfoundland government has decided to start a series of relief work to assist the destitute fishermen who have returned from Labrador without means of providing their families with a winter's subsistence. Owing to the failure of the fishery, thousands are likely to be starving before Christmas.

The Ontario cabinet was recently interviewed by a deputation of Port Hope people who are anxious to start a binder twine industry in that town. It was claimed by them that they could not successfully do so as twine was manufactured in the central prison, Toronto. The matter is to get due consideration from the Ontario government.

J. W. Lewis, freight conductor on the Canadian Pacific railway at Lake Megantic, met with a singular accident. His train came in about 7 o'clock, but instead of going to the hotel he stayed in the van for a nap and was found there an hour afterwards in an unconscious condition, a chew of tobacco having slipped down and lodged in his throat.

### Railroad on Anticosti.

Henri Menier, the owner of Anticosti, is determined to hasten the development of his new property, and is sending out from France steel rails and cars for a narrow gauge railway, already commenced, which next spring will be extended for more than a hundred and twenty miles. The system employed is the most perfect known in Europe for the purpose, being the De Caville system.

The cars, like the rails, are of steel, and a few miles of track are already in operation on the island. At present the cars, being small, are run by hand or horse power. Next season the power will probably be electric.

## MEDICAL AMENITIES IN BRAZIL.

The Unhappy Experience of Dr. Fort, who Criticised Brazilian Doctors.

In 1880 a French medical graduate named Fort established himself at Rio de Janeiro, where he soon acquired a great reputation as a skillful surgeon, thereby somewhat arousing the jealousy of the local practitioners. Returning to Paris after some years of expatriation he published his impressions of the Brazilian capital, making peculiar mention of the defective system of instruction in operation at the School of Medicine, and animadverting with much severity on the extreme lack of zeal manifested by the students. A few months ago Dr. Fort again visited Rio de Janeiro, but had it not been for the intervention of the French ambassador, the reception he was accorded by his former colleagues and their pupils might well have been attended by serious consequences. The following description of the fracas is furnished by a local paper: "At mid-day Ovar dor street was blocked by upward of 500 students crying with one voice, 'Death to Fort!' Dividing into groups they then proceeded to the various newspaper offices of the city, demanding the co-operation of the press in punishing the base maligner who, in their persons, had dared to insult the whole of Brazil and its inhabitants. After this they searched the hotels for their victim in order to lynch him, but happily Dr. Fort was absent from the city that day. Thus foiled they organized an execution in effigy with a funeral procession, the starting point of which was at the Medical Faculty. Upwards of a thousand students accordingly emerged from the faculty the next morning, in regular order, each individual carrying in his hand a lighted taper, while at the head of the column there was a catafalque with a coffin containing the effigy. On either side robed students bearing extra large candles marched as pallbearers; and scattered along the line was a plentiful display of banners decorated with asses' heads and other uncomplimentary allusions to Brazil's civilization. So realistic was the whole scene, that prayers for the dead were chanted while the procession was en route, and when the final act of cremation took place in San Francisco square it was accompanied by the solemn strains of 'De Profundis.' By a later account we learn that Dr. Fort was able to embark on the La Plata safe and sound," and also convinced, we should think, that Brazilian medical students have still some zeal left.—The Lancet.

### NEW STERILIZING IDEA.

The Scheme to be Tried in Paris on a Large Scale.

One of the newest applications of electricity, and one fraught with great possibilities for the future, is about to be tried at Paris, St. Petersburg, and Antwerp, where large experimental plants are being erected for the production of ozone, to be used in the sterilization of drinking water. Ozone, according to M. Repin, of the Pasteur institute, not only destroys the microbes, but is the only agent which destroys itself spontaneously after having acted without leaving any trace. It offers advantages over sterilization by heating, in that it does not remove the air from the water, and in that it has the advantage of destroying not only living germ, but also organic substances dissolved in the water.

The purification of drinking water by ozone has now been carried out on a large scale at Oudshoven, Belgium, for over a year. The water source at this place was a very polluted one, when untreated being absolutely unfit for use. At the first contact of the water and the ozonized air the greater part of the microbes are killed; but a few other resistant, and to kill these seven or nine minutes of continued application is required. As a remarkable example of the power of ozone for this purpose, of seventeen sample tubes thus treated sixteen remained sterile. It has also been found that ozonized water is very much less liable to re-infection than water which has been merely filtered and that the beneficial salts in water are scarcely affected by ozone.

The color and taste of the water are modified favorably. The only difficulty in the application of the process hitherto has been the want of suitably constructed apparatus to produce the ozone economically and in large quantities. This, however, is believed by M. Repin to have been solved. A practical apparatus is being exhibited at the hygienic exposition in Paris, and at the Belgium plant above referred to. Regarding the cost of the process, which depends chiefly upon the amount of organic material in the water and the price of coal, it has been found that in the treatment of the same water less than one-horse power per hour will be necessary for the sterilization of five cubic meters. A daily consumption of 300,000 cubic meters of water, as in Paris, will, therefore, require about 3,000 horse-power, the cost of operating which is not thought exorbitant. The ozone which is not used can be recovered by passing the same air through the apparatus again, and the same machinery can be used for the production of light at night and for the sterilization of water during the day, thus reducing a very fixed charge.—St. Louis Globe Democrat.

Use of Compressed Air in Buildings.

In one of the office buildings of New York city compressed air is added to the list of conveniences at the service of tenants. The Ingersoll-Sergeant Drill Co., which has offices on the tenth floor of the Havemeyer building, at 26 C. St. street, has placed an air compressor in the engine room of the building, and air power will be supplied to all the tenants of the building who desire it. The compressor is run by steam, and compresses the air into an air receiver, where it stands until ready for use. The building is piped throughout, pipes being run up through the shaft and branches taken off at the floors. The installing company will probably be the largest user. It will operate tools and machines of all descriptions for exhibition, and in addition air will open the doors, ring the call bells, operate the letter presses, dust the furniture and clean the carpets, rugs and other furnishings. The Ingersoll-Sergeant Co.'s exhibit will serve to bring into conspicuous notice the numerous mechanical and domestic usages to which compressed air may be applied to the office building or the home.

"It's all over." As the woman uttered these words she dropped to the floor. The baby had spilled the ink.

## 10 CENTS

SECURES A GOOD LIVER AND GOOD HEALTH.

As a System Renovator and Blood Builder, Dr. Agnew's Liver Pills are Supplanting all Others—So Great has been the Demand that it is Hard to Supply It.

Cure Constipation or Nervous Headache, clear the complexion, rid it of eruptions, yellow skin, coated tongue, etc. Act easy—Never gripe, and the after effects are a positive pleasure. In vials, 40 pills, 10 cents.

### WANT A RIDE IN THIS?

Telescope Tower One of the Sights at Paris 1900 Exposition.

If shooting through the clouds in a cane tottomed chair is not sensational enough to stir the blood of our modern novelty lover at the Paris exposition of 1900, let him enter the surveying tower, which will be built close by. There is nothing particularly startling about the suggestion of a surveying tower, you say. Just wait till you hear all.

You will enter a leaning cylindrical tower about fifty feet high and made of tempered steel. It looks like nothing more imposing than a metallic tower of Pisa. You find a circular seat inside, capable of holding about twenty persons. You will sit down and probably grasp the railing pretty tight, meanwhile holding your breath.

When the seats are filled you will suddenly shoot up into the air for a distance of 200 feet.

You will then discover that your tower is made of concentric steel tubes that telescope into each other, and that you are at the apex of the innermost—and now uppermost section.

But the big tower will not stand straight up. It will bend over rainbow fashion, in a long arc, with you dangling at the end of it, for all the world like a fish at the end of a swaying rod. Then it will revolve slowly from its base, swing you in a wide circle over a large portion of the exposition grounds, and finally land you on a stationary tower, down which you drop by an elevator to the ground.

The scheme of this tower was chosen as the most startling of 500 remarkable suggestions. One of the rejected schemes, by the way, was to build a temple of literature out of bricks composed of the compressed pulp of rejected manuscripts. The idea appealed strongly to the imaginations of the managers, but the sensational features of the tower prevailed.—Boston Globe.

"Is Miss Cahoots in?" inquired the caller. "That depends on you. Are you Miss Jones?" said Bridget. "Yes." "She's gone out."

### A POPULAR C. P. R. OFFICER.

Adds His Testimony to the Merits of Dr. Agnew's Catarrhal Powder for Catarrh and Cold in the Head.

He Says it is Peerless.

Mr. John McEdward, the genial purser of the C. P. R. liner "Athabasca," says: "I used Dr. Agnew's Catarrhal Powder for cold in the head. It is very effective, easy to apply, mild and pleasant. For catarrh it has no equal. I have tested nearly every catarrh cure made, and found none to compare with it. I recommend it first, last and always."

"What's this?" the sultan shouted, "Do they propose to interfere with my killing a few people whenever I feel like it?" "That seems to be the idea sir," said his prime minister. "Humph, I'll circumvent their impudence." "In what way, sire?" "I'll abdicate and get a job running a trolley car in Brooklyn."

### OLD WAR HORSE.

A Grand Army Man Crosses Swords With Heart Disease and Wins a Glorious Victory With the Aid of Dr. Agnew's Cure for the Heart.

Dr. Agnew's Cure for the Heart can not be over estimated, says H. M. Muselman, a well known G. A. R. man of Weissport, Pa., and he continues: "My ailments were palpitation and fluttering of the heart. I used two bottles of your valuable cure and feel like a new man. I have taken bottles and bottles of other medicines without help. I introduce it to my friends at every opportunity possible. It is a great medicine. Inside of 30 minutes after the first dose I had relief."

"I dunno ez the prodigal son was so very bad, after all," said Mrs. Cornsossel. "He wa'n't no good to his family," her husband rejoined. "That's a fact. But when he got home he didn't hev no more to say. Ef he'd been like most of the men folks nowadays, the first thing he'd have done would of been to find fault with the way the fatted calf was cooked."

Itching, Burning Diseases Cured for 35 Cents.

Dr. Agnew's Ointment relieves in one day and cures faster, salt rheum, piles, scald head, eczema, barbers' itch, ulcers, blotches and all eruptions of the skin. It is soothing and quieting and acts like magic in the cure of all baby humors; 35 cents.

Willing to Be Educated.—"This is undoubtedly a campaign of education," remarked Mr. Figg to his visitor, when Tom interrupted him with: "Say paw." "What is it?" "Can't I stay out of school until it is over and get my education following the parade?"

Dr. Fowler's Extract of Wild Strawberry cures Diarrhoea, Dysentery, Colic, Cramps, Cholera, Cholera Infantum, Cholera Morbus and all summer complaints and fluxes of the bowels in children or adults.

"I am writing a play which cannot fail to be a great success," said Foyer to his friend. "What is its chief feature?" "In the last act the comedian who has perpetrated all the chestnuts dies a miserable death."

Itch on human and horses and all animals cured in 30 minutes by Woolford's Sanitary Lotion. This never fails.

He—My life without you would be a lonesome one. The Heiress—But think how busy you will have to be.

## ADAM'S GINGER BEER.

For Making a Delicious Health Drink at Small Cost.

Receipt—Adam's Root Beer Extract . . . one bottle Fleischmann's Yeast one half to one cake Sugar . . . . . two pounds Cream of Tartar . . . . . one half ounce Lukewarm water . . . . . two gallons

Dissolve the sugar, cream of tartar and yeast in the water, add the extract, and bottle; place in a warm place for twenty-four hours until it ferments, then place on ice, when it will open sparkling, cool and delicious.

The ginger beer can be obtained in all drug and grocery stores in 10 cent bottles to make two gallons.

"Poor little Billy!" "What's the matter with him?" "He was taking German lessons from a female teacher, you know. Well, she had him propose to her in German, and before he knew what he was saying she accepted him."

Tobacco Heart.

Much heart and weak nervousness is caused by undue use of tea, coffee or tobacco; palpitation, nervousness, irritability, excitability, lack of confidence, etc., are sure symptoms. Milburn's Heart and Nerve Pills bring instant relief, by steadying the nerves and regulating the heart. They are a true heart and nerve food.

"The trouble with so many of the young men of this day and age," remarked old Uncle Sagely, comparing his watch with the noon whistle, "is that they think there is a patent on work, and they are afraid of getting into trouble if they use it."

### A Boon to Horsemen.

One bottle of English Spavin Liniment completely removed a curb from my horse. I take pleasure in recommending the remedy, as it acts with mysterious promptness in the removal from horses of hard, soft or calloused lumps, blood spavin, splints, curbs, swellings, stifles and sprains.

GEORGE ROBB, Farmer, Markham, Ont.

Smurbs—"Say old man, can I talk to you for a moment?" Curbs (dejectedly)—"What is it?" Smurbs—"Can you loan me a five?" Curbs (joyously)—"Certainly, old boy, I thought you were going to explain the political muddle to me."

Constipation Cured.

GENTS.—I was in very poor health for over four years; the doctor said it was constipation. Not wanting to spend too much cash, I got three bottles of B. B. B. and took it regularly. I can certify that I am now in the best of health and feel very grateful to B. B. B.

ALFRED TERRY, Montreal, Que.

"Jinks has the air of a man of considerable importance." What's his particular line?" "Oh nothing much, except telling other people their business and giving us all pointers on how to run the government."

As Well as Ever.

DEAR SIR.—After suffering for two years from acute indigestion, I tried B. B. B. I took only three bottles, which made me as well as ever I was. I highly recommend B. B. B. to all dyspeptics.

Mrs. JOHN WHITE, Austin, Man.

The political canvasser had run across the office boy. "Does your employer favor or inflame?" he asked. "What do I care?" inquired the boy. "Well, I guess you'd think he does if you could see the way he blows me up when I'm late gittin' to de office."

One Every Night.

One Laxa-Liver Pill taken each night during 30 days will cure Constipation, oft-returning Headaches and irregular action of the bowels. Laxa-Liver Pills leave no unpleasant after effect.

"Cook, how long did you boil those eggs?" "Noine minutes, mum." But I told you that I wanted my eggs boiled three minutes." "That's three, mum—but there was tree eggs, mum, an' tree times tree is noine."

Dr. Fowler's Extract of Wild Strawberry cures Diarrhoea, Dysentery, Cramps, Colic, Cholera Morbus, Cholera Infantum and all bowens of the bowels. Never travel without it. Price 35c.

"Why, Tommie, back from school already?" "Yes, Mike wouldn't let me stay." "Av course not," said Mike. "Yez would me to take Tommie down to the school, ma'am, but yez didn't say nothin' about lavin' t' b'ye there."

## ITEMS SHORT AND INTERESTING.

A Resume of the Events of the Week—Prominent People, Their Sayings and Doings.

Crystal City will have a skating rink this coming winter.

A new Presbyterian church has been opened at Brandon Hills.

Hambro will have a new curling and skating rink this winter.

A recent clean-up at the Cariboo mine produced \$35,741 in gold.

Two freighters were drowned in the Columbia River near Revelstoke.

Residents of the Camdelf section are calling for three trains each week both ways.

An illicit still has been seized by Inland Revenue Collector Costigan, at Wawanesa.

Mr. Bert Eison, from near Crystal City, intends shortly leaving for Africa as a missionary.

Bread has gone up in price in Winnipeg, in consequence of the increased price of flour.

Miss Nordica, the world famous soprano, appears in Winnipeg this month, and Alhambra in January.

The department of agriculture has appointed a number of sheep inspectors throughout the country.

Senator McInnes is spoken of as the successor to Mr. Dewdney as Lieutenant Governor of British Columbia.

The butter from the government creamery at Prince Albert, sold in London at about 22 cents per pound.

Mining in Rat Portage continues in increased interest. Some of the later prospects are turning out well.

Sir C. H. Tupper is at the Pacific coast, where he appears as counsel before the Behring sea sealing commission.

The election expenses for the Brandon election, incurred by Mr. Dalton McCarthy, are advertised as \$2,193.43.

The War Eagle mine, at Roseland, B. C. has sold another dividend of \$30,000, making a total of \$187,500 in dividends.

Line's grain warehouses and stable, and some grain and furniture were burned at Edmonton, Alberta, on October 10th.

James Talyard was arrested in Victoria recently for obtaining money under false pretenses, he having sold a worthless mining claim.

G. A. Griffith, one of the pioneer merchants of Balder, has sold out, and intends removing to Winnipeg to open a Keeley institute.

Suit has been brought against the rural municipality of Franklin by Mr. Archer, to recover damage done to his property by the blocking of a ditch.

Complaints from the mining district of Kootenay, B. C., say the Indians are slaughtering salmon and trout, and blocking up streams for that purpose.

R. P. Ethier & Co., of Victoria, B. C., who manage the flour mill at Enderby, in that province, have recently brought in six carloads of wheat for their mill from Moose Jaw, Assn.

Four intoxicated half-breeds attempted to cross a Saskatchewan opposite Prince Albert, in a skiff. When in midstream an carbide. The boat capsized and two of the occupants, brothers, named Tait, were drowned.

Mr. Edward Sherick, employed on a work train, east of Port Arthur, was seriously injured by the bursting of a gun barrel while he was firing at an owl. A piece of steel penetrated his forehead for some depth, inflicting a serious wound.

Dr. Milne, the defeated Liberal candidate for Victoria, has received a challenge from Dr. John A. Dandean, also of Victoria, to fight a duel with pistols at six paces. The penalty for issuing such challenge is three years in the penitentiary.

The Horne-Payne company, are about to erect at Laurie, B. C., their new town site, three miles east of Illecillewaet, a hotel larger than that at Glacier. They are also going to put up a suite of commodious offices for their mines in that district.

The \$300 reward offered by the Dominion Express company for the arrest of Condie, the Oak Lake confederator, will be given to the man Adamson, who was the cause of his arrest. It is said that Adamson intends giving the money to Condie's wife and children.

Mr. A. Whallier, barrister, of Kaslo, B. C., formerly of Winnipeg, is largely interested in the Lond. & Hill Development and mining company formed to acquire, develop and work the "Lond." group of mineral claims situated in the Ansenworth and Slocan districts.

Dr. Hinman, of Winnipeg, who recently attended a meeting of veterinary surgeons at Buffalo, says that several strong resolutions were passed regarding tuberculosis, and the general opinion was that very stringent regulations are necessary to protect customers of milk, etc., owing to the existence of this disease among dairy cows.

Adam Davis, a German, and a farm laborer, was found asphyxiated in a room at the Park hotel, Grand Forks, a few days ago, through leaving the gas turned on. Among his effects were found letters showing that his wife and four children are in Germany, or rather, in a German settlement in Russia, and that he had a brother living in Winnipeg. The brother was notified by telegram.

Returns received at the custom department show that the total mineral exports from the port of Nelson, B. C., during the month of September were valued at \$94,313. In view of the report of the development of that section the controller of customs has instructed Inspector Dale to proceed to the Kootenay and report upon its requirements in the way of additional customs facilities.

Sheep ranching in Alberta has not been successful this season as last. The cause is the low price of wool. Last year this product sold for 12 and 14 cents per lb. This year the buyers offered 7 cents, and seemed indifferent at that. Several of the ranchmen shipped their season's east to agents to effect a sale. This plan

is not so satisfactory, however, and many have kept their wool, intending to hold over to next season.

A Nelson, B. C., dispatch says: "E. A. Powye, agent for several makers of mining machinery, resident here for about a year, disappeared one evening recently, and has not since been heard of. He is well known on the coast, particularly in Vancouver. He was suffering at the time from a recurrent attack of jungle fever, contracted in India. All efforts to trace him have proved fruitless. Grave fears are entertained for his safety."

A short time ago it was announced that a discovery had been made whereby electric power could be transmitted long distances with great economy. It is now announced that the Keewatin Power company is preparing to utilize the immense water power secured through its dam at Keewatin by making a contract for the transmission of at least 5,000 horse power over an electric wire to Winnipeg. The distance from Keewatin to Winnipeg is about 130 miles. The Keewatin Power Co. own an unlimited power, and if it can be cheaply transmitted to Winnipeg it will be a great boon to the prairie city.

## STEALING ELECTRICITY.

Current is Taken From Trolley Circuits And Used in Houses.

It is asserted that the stealing of current from trolley circuits for use in houses, saloons and stores is becoming very common. This is not surprising, in view of the ease with which the tapping of the circuit can be effected. A simple test for determining the source of any suspected electric lighting was put in practice recently with conclusive results. A station superintendent, in passing a saloon, noticed the electric lights go out, and then start up bright again, as the trolley cars passed. He thought that was a queer way for the lights supplied by his station to behave, and he decided to investigate. Being familiar with the technical difference between the current system for lighting and the method of supplying electric power for the propulsion and illumination of cars, he knew that by a very simple experiment he could find out something more as to the source of the supply of the current. A lighting company wires a building so that any incandescent lamp in it can be shut off or taken out without affecting the others. In a railway plant the lamps are fed in such a way that if one is shut off all cease to glow. The superintendent passed into a side room of the saloon and quietly unscrewed one of the incandescent bulbs. As he expected all the lights on the same wire went out. On the following night the current supplying the electric line on that street was, by agreement, cut off at a certain time. At that moment the illumination in the saloon ceased. When the current was turned on again the saloon was again lighted up. Examination showed that the wire had been tapped near the saloon, the connection with the feed wire being made by means of a nail. A large number of similar "taps" were found. In some cases the job had been done by a "rogue" station man," who had called regularly for payment of the current supposed to have been consumed. This, at all events, was the story told by some of those who were found using the stolen current.—Chicago Record.

## Business in the Early Days.

Some amusing stories are told of the business was done at Fort Garry (Winnipeg) in the early days. Such a thing as wrapping up parcels was never thought of at the Hudson's Bay Store. Customers were supposed to provide their own packages. Tea, which was a staple among the natives, was usually tied up in the handkerchief of the purchaser. C. A. Loveland, who visited Fort Garry 38 years ago, on his way west on a prospecting tour, relates the following regarding his experience here in those days. He says: "The rule was to hand down the first a tide of the kind asked for, thus a 200 pound man would probably be handed a pair of pants of a size suitable for a 120 pound man, and he was expected to take them and vice versa. They objected to any selection being made. Mr. Loveland himself had great difficulty in getting supplies at all. He was ten days before he could get attended to. The store was opened in the morning and closed at a certain hour in the afternoon, and all who were inside at closing time were ordered out and had to wait their chance next day. After he had waited several days he remained at closing time and by his persistence got the clerk to serve him after hours. He wanted a pound of tea and was told to put out his handkerchief; they knew nothing about wrapping goods in paper, and when he had persuaded the clerk to find him a piece of coarse paper and a string he was handed a half inch rope to tie up the parcel containing the pound of tea. When he asked for a quart kettle the nearest one was handed him, which would hold some two gallons, and it was only by more persuasion that he could induce the clerk to let him have one the size he wanted from a little further along the rack.

## Blockade at Buffalo.

Buffalo is threatened with the biggest blockade of vessels in the history of the port. Duluth, Chicago and Milwaukee and the ports of Lake Erie are pouring in vast fleets of grain every day, much greater than the elevators can handle, and it now looks as though the elevators would be hopelessly swamped in a few days unless there is a let up in the arrival of the fleets.

For the past week the fleet has been accumulating. The immense grain crops of the west are now ready for shipment, and, under the influence of the demand, grain rates at Duluth and Chicago have advanced to such a figure as to attract the fleets usually busy in the iron ore trade. There was grain enough to go around for nearly all the boats in service, and vessels that had been laid up were fitted out again and sent after grain cargoes. Nearly all of the grain has come to Duluth, and the elevators have been unable to unload the boats on their arrival.

There was nearly a score of boats waiting at one time for one elevator last week, and Saturday night saw the fore-runners of a large fleet coming in. The arrivals continued all Sunday and Monday, and the creek is full of boats. Vessel owners will be fortunate if their boats are not detained many days at a time unless the flow of grain is shut off soon.

## WHAT TO DO WITH THE FRUIT.

Problem for California Growers Becomes More and More Serious.

The marketing of the immense and rapidly increasing fruit crops of California is a matter of vital importance to the growers of that state. The manager of one of the largest fruit-producing companies of the Pacific slope, when asked about this subject by a Tribune reporter the other day, said:

"California is capable of supplying the markets of the world with most kinds of fruit. Her yield is something enormous, and is increasing so fast that there is considerable apprehension as to how crops can be advantageously disposed of in the future. The variety of California fruit is also wonderfully great, as it includes oranges, lemons, pears, peaches, apricots, and grapes. In 1885 the entire output of California fresh or green fruits was less than 25,000,000 pounds. The output this year will probably be about 200,000,000 pounds. Besides the fresh fruit output, which is the dried and canned product, which will be not less than 350,000,000 and may reach 400,000,000 pounds.

It is commonly supposed that the canning and drying of fruits is the best way of disposing of the immense crops, but while it is an effective factor it is not everything. California canned fruits are delicious, but the mass of the people cannot afford to consume them extensively. As the product increases, however, the cost may be reduced so as to bring the articles within the reach of most consumers.

"California fruits are distributed throughout this country in refrigerator cars, each of which carries from 20,000 to 25,000 pounds. The fruits that come to New York are usually about ten days on the road. When the season is at its height, the weekly receipts in this city amount to from 90 to 100 carloads. Special trains are sometimes run to carry fruit designed for export. These trains are so timed that they will arrive here just before the sailing of trans-Atlantic steamships. The American and White Star steamship lines have incurred great expense in providing refrigerator compartments for the transportation of California fruits, but up to the present time the business has been unprofitable to the shippers. Determined men with practically unlimited capital are behind the export business however, and they appear to feel confident that ultimately it will be made profitable despite the profligate transatlantic fruits with which they have to compete.

"There are from 450,000 to 500,000 acres of land under fruit cultivation in California. About two-thirds of the trees in bearing. Other trees are constantly being planted, and, of course, the number of bearing trees is steadily increasing. The product is increasing faster than the population of the country, but the consumption of fruit is becoming more general; and when it is cheap and times are good, the demand will probably more closely approximate the supply.

"The growers must rely upon a wide distribution of their crops in some markets. In order to make such distribution single carloads of fruit must be sent to small cities and large towns, where the use of fruit elsewhere has been limited. In this country consumption can be greatly stimulated."—New York Tribune.

## PERSONALS.

Postmaster-general Wilson will try the rural free mail delivery at his home, Charleston, W. Va.

A granite block has been erected to the memory of Prof. Huxley on the southern shore of the Lake of St. S.

Rev. A. Robbins, the first chaplain in ordinary of Queen Victoria at Windsor, has just preached his 5,000th sermon.

A Waterloo veteran, aged 99 years, has been discovered among the inmates of the Nottingham workhouse, England.

William Thompson, C. E. of London, received the idea of pneumatic tires from the pneumatic springs which were proposed for carriages in 1845.

John Endicott, of Beverly, Mass., is the only living eye-witness of the famous engagement between the Chesapeake and the Shannon. He is almost 100 years old.

Herr Krupp, the gun manufacturer, has dismissed all foreign workmen and officials from his employ on the ground of their betrayal of secrets to foreign governments.

Napoleon Bonaparte and George Washington were two pensioners recently examined at the Baltimore sub-treasury. Their records of deserving soldiers proved to be all right.

Misses MacGregor and Gables, of the university of Edinburgh, have recently received the degree of M. A. from that college. This is a new departure for a Scotch university.

Judge Livingston W. Cleveland, the Republican nominee for Probate Judge in New Haven, Conn., has given a gold-lined shirt to each of the forty delegates of the convention.

Maceo's Master Stroke

A special to the Jacksonville Citizen, Fla., from Key West, says: "Passengers by the Maceo, from Havana, report that General Antonio Maceo, with 2500 troops, broke through the trocha, and that he is now in the Havana district. He went over to assist General Gomez in his march to Havana. Maceo left General Rios in charge of his troops in the province of Pinar Rio, with 10,000 men in the insurgent stronghold. The report that the Spanish troops had captured his camp was true, but it was the place where the insurgents were awaiting a favorable opportunity of crossing the trocha; and after Maceo had broken camp, General Maceo, of the Spanish army, with 1,000 men, made an attack on Antonio Maceo on the hill known as Cacarrajaras. Maceo in the meantime, retreated by the rear of his camp with his forces, and attacked the town of Artemisa, headquarters of the trocha. Maceo sent into the town for the women and children to leave before the bombardment, but the Spanish general, Aroles, refused to allow them to leave, saying that they should all perish together. Maceo then bombarded the town and passed through the trocha to the province of Havana. Maceo attacked the hill where he thought Maceo was and finally found a small detachment of insurgents ordered to the hill to distract the Spanish general's attention while Maceo attacked the trocha. The town of Artemisa was terribly wrecked and many people are reported killed.

## ATHLETIC DANGERS.

CARELESSNESS OFTEN BRINGS ABOUT SERIOUS RESULTS.

A Lacrosse Player Prostrated for Months as a Result of Over Exertion—The Trouble Located in the Spine, Leaving Him Helpless.

From the Alexandria News.

The rising generation of Canadians are noted for their love of athletic sports, and, while indulging in moderation should meet with every encouragement. There is no doubt, however, that many who indulge in popular pastimes are altogether too careless, with the result that shattered constitutions frequently follow in the train of athletic sports. Among those who have suffered severely in this manner is Mr. A. L. McDougall, of Lancaster township, in the county of Glenelg. In 1891 Mr. McDougall, like many other bright young Canadians, left his home to push his fortune in the Western States, locating in Superior City, Wis. Like many of the young men of his native country, he was an ardent lover of lacrosse, and had not long been in his new home before he was a member of a lacrosse team, and one hot 4th of July played in a match, the contest for supremacy in which was very keen. The vigorous play produced profuse perspiration, followed by chilliness due to inactivity. A severe cold was the result, followed by still graver consequences.

The nervous system was gradually undermined, and this was followed by the loss of power to walk and general helplessness. One doctor after another was consulted, and each pronounced the ailment to be a disease of the spine and incurable. After undergoing four months of treatment and blistering without the least beneficial effect, Mr. McDougall decided to return to his old home, while yet he had some strength left. To one in his condition the journey was indescribably wearisome, and he arrived home utterly exhausted. The family doctor was called in but the result was disappointing as before. By this time Mr. McDougall says he had lost all faith in doctors and came to regard their practice as costly experimenting. Finally his mother informed that he give Dr. Williams' Pink Pills a trial, and more to please her than from any strong hopes of benefit he consented to do so. He says he had not been taking the pills long before he found remarkable benefit, and their continued use for a few weeks longer fully restored him to health and activity. "The result," says Mr. McDougall, "has been more than satisfactory, in fact, I have not had a pain since, and I can do as hard a day's work as any man on the farm. The doctors said I would always be helpless but thanks to Dr. Williams' Pink Pills their predictions have not been verified. I most cheerfully give my experience in the hope that some else may take hope and find renewed health in the use Dr. Williams' Pink Pills."

The experience of years has proved that there is absolutely no disease due to a vitiated condition of the blood or shattered nerves, that Dr. Williams' Pink Pills will not promptly cure, and those who are suffering from such troubles would avoid much misery and save money by promptly resorting to this treatment. Get the genuine Pink Pills every time and do not be persuaded to take a cheap imitation or some other remedy from a dealer, who for the sake of extra profit, will tell you that the pills are "just as good." Dr. Williams' Pink Pills cure when other medicines fail.

## WILL TRY AN EXPERIMENT.

A New System For the Treatment of Low Grade Ores.

An experiment is about to be tried, which, if it proves successful, will mean placing upon a basis more solid than ever the development of the Trail Creek gold mines. Under the present expensive methods of extracting the precious metal from the rock, it does not pay to mine ores carrying anything less than \$14 a ton. Now, while many of the Rossland claims are full of exceedingly rich ores there are other properties which contain great bodies of low grade quartz. These latter, (and further developments may bring many of them before the public) will not likely pay good dividends under the costly smelting process at present in use. The proposed experiment referred to above is the application of the cyanide process with a view to the economical treatment of low grade ores. Up to date the cyanide method has succeeded in extracting 85 per cent. of the gold found in low grade ores, at a cost of only \$2.50 per ton. A custom cyanide and potassium plant worked on the MacArthur-Forrest principle is to be erected at Rossland, and should the attempt prove successful, which it doubtless will, a good remuneration will be gotten from mining even five and six dollar ores. The importance of this proposition cannot be over-valued, for it is calculated not only to turn non-paying mines into dividend affording properties, but also to largely increase the possibilities of those mines containing high grade ore, for even these properties yield quantities of quartz, which is never taken from the dump because of its low value.

## ALASKAN GOLD MINES.

\$3,300,000 Produced Last Year From Ore Yielding Less Than \$1 Per Ton.

James Sheakley, governor of Alaska, in his annual report to the secretary of the interior at Washington, says: "There is great encouragement in the outlook for Alaskan gold mines. During the year ending the first of this month \$3,300,000 in gold bullion has been taken from the mines, the greater part being the product of low grade ores, much of which yielded less than \$1 per ton. Almost any grade of gold ore now can be worked at a profit there. Confidence in Alaska as a gold producing country increases with the development of her resources. A number of gold bearing quartz ledges and placer deposits have been discovered in the Sitka district and several are under development with good prospects. The gold placers of the Yukon region continue to attract the attention of gold miners and fortune seekers, but no rich discoveries have been reported from there." Several wild reports, the governor says, have started rumors of treasure seekers to Cook's Inlet gold fields during the summer, but only to meet disappointment and hardship, and the people are getting back out of the district. The governor believes, however, that there are paying gold deposits there.

## THE NEWS IN GENERAL.

The Incidents of the World Around us Briefly Portrayed.

Great quantities of rain have fallen in Italy.

The town of Kuroff, Russia, has been destroyed by fire.

Heavy snow has fallen in the north of England and Scotland.

A new British cruiser, the Diadem, has been launched at Glasgow.

The wheat crop has entirely failed in the northern part of South Australia.

Sarah Ann Angell claims one-third of Jay Gould's estate as his lawful wife.

Owing to the prolonged war, Spain will be compelled to import breadstuffs.

Crops are seriously damaged in several parts of India, and a famine is inevitable.

Pullman Palace Car Company have paid nearly \$3,000,000 in dividends during the past year.

The revenue cutter Preterolia is seizing nets and warning off United States poachers in Lake Erie.

It is reported that a tripartite alliance has been formed between Great Britain, France and Russia.

The business portion of the town of Milton, N. Y., has been completely destroyed by fire. Loss about \$50,000.

Miss Deans, a New York school teacher, has begun suit against the A. T. Stewart estate, claiming to be one of the heirs.

A diabolical plot to wreck trains on the Northern Pacific has been discovered. The scene was to have been in Minnesota.

The U. S. minister to Turkey, Mr. Terrell, says there has never been any intention that the Bancroft should force the Dardanelles.

It is reported in London that a Chinese doctor, charged with conspiracy, has been arrested and confined in the Chinese legation.

Hamlin J. Andrus, of Yonkers, New York, was killed by a big dynamite bomb set to kill his brother John, by parties unknown.

A newspaper and magazine writer in Dresden poisoned his wife and family and then suicided, owing to failure to gain a livelihood.

A number of Cuban prisoners were recently landed at Cadiz, Spain, and on their way to jail, were stoned and hissed by an excited mob.

Three men entered the bank at Meeker, Cal., and seized all the money in sight. They were all three killed by citizens while attempting to escape.

The Chamber of Commerce in San Francisco declares marine supremacy on the Pacific will never be attained by the U. S., unless the government make more liberal provisions.

W. M. Hoyt, of the firm of W. M. Hoyt & Co., Chicago, importers and wholesale grocers, has presented to Mr. Bryan, the Democratic candidate for president, a house and two lots in Lincoln, Neb., in lieu of a cash contribution to the campaign fund.

A dispatch from Rome says: The Vatican does not wish the clergy of the United States to take part in the campaign, lest there should be a new division in the ranks and an outburst of intemperate expression of political opinion on the part of more impetuous bishops.

Word from Australia contains the information that that country has developed a wealth wonder in the sculling line. Lambert is the man, and although he has been rowing for some years, he has not developed much until his year. It is said he will challenge Gandaur next year for the world's championship.

## WESTERN MINING.

How Its Industries Can be Benefitted.

Mr. D. D. Mann, the railroad contractor, has returned from a trip to the Pacific coast. Among the points visited was the North Star mine, near Fort Steele. Mr. Mann is the president of the company which owns this mine. The work of development has been going on for ten months and the output of silver and lead has been very satisfactory, about 6,000 tons of ore being mined. Of this 2,500 tons have been shipped to market. This output of 6,000 tons was taken from drifts and cross cuts while developing the property, leaving about 45,000 tons in sight in the mine. The ore is sent to smelters in the United States.

"We have paid \$25,000 import duty to the States," said Mr. Mann, "for the privilege of having this ore reduced and marketed in that country. It would be folly for Canada to reduce her tariff while the United States maintains such a high tariff wall. What the mining interests of Canada need is a fair trade rather than a free trade. While reciprocity with the States would do mining much good, free trade on our part only would be detrimental to the mining interests of British Columbia."

"In your opinion," asked a Free Press reporter, "what course should the government adopt in dealing with the tariff in this connection?"

"In the first place," was the answer, "the government should build the Crow's Nest Pass railroad or assist a company to do so. This would lead to the development of the coal mines in that district and furnish cheap coke for smelting purposes. This would give a great impetus to mining in British Columbia and create a market for the eastern manufacturers. At Vancouver there should be a refinery to separate the precious metal from the base. This would admit of large shipments of lead to China and other countries where it is largely used as these British Columbia would be independent of the States, to which we pay \$20 a ton as an import duty on lead bullion, and Canada could maintain as high a tariff as now exists in the States. The Dominion government should ask the imperial government to establish mints in British Columbia, in order to coin the output of our own mines, the gold now produced in British Columbia being sent to the United States mints, to be adorned with the stamp of the eagle. This would enable a miner to exchange his gold dust for sovereigns, which would make it unnecessary to pay middlemen's and brokers' fees.

"New discoveries are being made every day," continued Mr. Mann, "but on account of lack of transportation, it is impossible to mine successfully in many

districts. In my opinion the B. C. government should bonus a refinery at Vancouver, because they receive a direct revenue from the miners as well as from the producing mines. With increased transportation facilities British Columbia will, in the near future, be one of the greatest mining countries in the world."

## A Miner Buried Alive.

Carlton F. Wells, two years ago started from Trenton, N.J., for the Arctic gold fields, and, after accumulating a fortune of \$20,000, was stricken with heart disease at Juneau, Alaska, and buried there. In his will he bequeathed his property to his wife in Trenton, and it was forwarded to her. She sent word to have the body exhumed and shipped east for permanent interment. When the coffin containing Wells' almost decomposed body was opened, the inspection showed beyond a doubt that Wells had awakened from a deathlike trance after burial. In the skeleton right hand was clenched the gutta percha plate bearing three false teeth, which in his agony Wells must have torn from his mouth. In the coffin was also found a plain gold ring, which the dead man had worn. In view of this terrible discovery the undertaker and doctor who had attended Wells at Juneau, decided not to send the remains to his Trenton home.

He—Have you any reason for doubting what I say? She—Yes, I have. He—What is it? She—I don't believe you.

## NORTHERN PACIFIC RAILROAD.

**Marry This Girl Quick.**  
I saw in your paper that a 13-year-old boy made \$1.25 the first hour he worked selling the Perfection Metal Tip Lampwick. I ordered a sample and went to work and the first week I cleared \$10, the second week I cleared \$15. I expect to run up to \$25 a week in the near future, as the Perfection Metal Tip Lampwick makes such a beautiful white light and does away with smoky chimneys and bad odor and saves oil, it is easy to sell. If you wish to try it, send 13 2-cent stamps to Miss A. M. Fritz, Station A, St. Louis, Mo., and she will send you sample outfit. This is a good way to make money around home. Miss Tris W.

## Local and General

—The Webbing Sisters appear here on the 23d.

—Mr. E. W. Warner went to Winnipeg last night.

—Mr. A. Davidson, of Indian Head, was in town yesterday.

—Mr. W. J. Davidson returned from Touchwood on Saturday.

—Take a look at the display in C. Babbitt's window. It's nice.

—The Qu'Appelle Valley flour mills are now running full blast.

—When you buy the famous BEAVER Chewing Tobacco, be sure the word Beaver is on each plug.

—Wheat is now standing at 57c. There are three buyers on the market.

—Mr. J. P. Beauchamp shipped a carload of wood to Indian Head this week.

—Mrs. J. T. Boden, of Touchwood, is visiting Mrs. J. H. Fraser and friends in this district.

—The machine operators on the Winnipeg Tribune struck work yesterday for a fixed rate of wages.

—If you want to enjoy the comforts of home, buy a fine package of the genuine FOKKA smoking mixture.

—The new hall of the Elgley Football club will be opened on the 24th by a grand entertainment and supper.

—Mr. A. S. Smith, ex-M.L.A., is advertising the sale of his horse and buggy at the Fort on the 12th inst.

—J. E. V. Simpson, representing the Webbing Sisters, in a tour of the world, paid us a friendly visit last week.

—As we go to press it was comes that McKinley has been elected president of the United States by a large majority.

—Mr. Inzer, optician, of Montreal, has found business so good in this district that he has decided to remain a few days longer.

—The Misses Webbing will be here again on the 23d of this month. Everybody was delighted with them when here last.

—Thursday, the 26th inst., has been appointed a day of thanksgiving throughout the Dominion by the Governor-General.

—His Honor Judge Richardson, accompanied by Sheriff Benson, of Regina, spent a day in town after attending court at the Fort.

—Church of England service will be held next Sunday, at 3 o'clock, at Mr. Cooper's, Vernon Settlement, and every alternate Sunday from that date.

—W. F. Quinn, arrested last week for forgery and horse stealing was brought before Justice Guernsey, of the Fort, and sent to Regina to stand his trial.

—Mr. and Mrs. Walsh, of the experimental farm, Indian Head, were in town yesterday to witness the marriage of Mr. Ab. Miles to Miss Katie Cooper.

—Mr. A. Hollingshead has completed his contract of painting the handsome farm residence of Mr. J. A. Longpre, of Strathcarroll, who has moved into his new home.

—Mr. Geo. Shaw has purchased a small building from Mr. G. H. V. Bulvea, M.L.A., and moved it down near his blacksmith shop. He intends using it as a woodwork shop.

—P. Cavanagh and Chas. Kennedy, two gentlemen without any visible means of support and a vigorous appetite for fluid refreshments, were arrested for vagrancy last week. Mr. Cavanagh will saw wood for the Queen in Regina for 30 days, while his companion will

**A Chance to Make Money.**  
I have made \$1.64 clear money in 87 days and attended to my household duties besides, and I think this is doing splendid for a woman inexperienced in business. Any one can sell what everyone wants to buy, and every family wants a Dish Washer. I don't canvass at all; people come or send for the washer, and every washer that goes out sells two or three more, as they do the work to perfection. You can wash and dry the dishes in two minutes. I am going to devote my whole time to this business now, and I am sure that I can clear \$5,000 a year. My sister and brother have started in the business and are doing splendid. You can get complete instructions and hundreds of testimonials by addressing the Iron City Dish Washer Co., Station A, Pittsburgh, Pa., and if you don't make lots of money in your own town.

he employed on odd jobs for 60. Officers Fyffe and Rudd are a holy terror to this class of gentry and a devil doers generally.

—A concert and bazaar will be held in the schoolhouse, Springfield, under the auspices of the ladies' aid, on the evening of the 12th inst.

—Waghorn's Guide for November contains all official changes in time cards, etc., etc. This handy pocket-companion still leads in its fund of useful information.

—Stovel's Pocket Directory to hand contains all official changes in time cards, postal information, county court sittings, etc. This Guide is becoming more popular every issue.

—The trial of Robert Morran, indicted for the murder of Hannah Hutton, is now going on in Winnipeg. Forty-three witnesses are to be examined and it is expected that the trial will last ten days.

—On Wednesday night of last week the 2-year-old child of Mr. and Mrs. W. Cowan, of Regina, was given carbolic acid in mistake for medicine, the wrong bottle being taken in the dark. The result was fatal.

—Mr. J. Lynch is engaged hauling lumber out to the Mission. Mr. Lynch informs us that the manufacture of felt has lately been added to the industries of that institution and that a first class article is being turned out.

—The season of the year when the farmer had put off his stogias and dons his dancing pumps is fast approaching. From all appearances our young people intend to enjoy themselves this winter. Several dances and social functions are already mentioned.

—Monday week two men on the Brassey estate started to burn a fire guard around some hay stacks. The fire got away from them and burnt a large stretch of country five miles south-east of here. Sergt. Fyffe and others succeeded in extinguishing it about 10 p.m. The fire started at noon.

—The cow with the rubber neck is causing the thrifty husbandman much annoyance these days. Scarcely a day passes but she tears open a bag and helps herself to a mouthful or two of No. 1 hard (57c per bushel). The attention of our municipal Salons is called to this daily infraction of the town by law.

—On the crest of the wave of success is THE FAMILY HERALD AND WEEKLY STAR, Montreal, a paper for me I know to send any description. THE FAMILY HERALD AND WEEKLY STAR has a variety of beautiful premium pictures for a new and renewed subscribers. It is entitled "The Orphan's Prayer." THE FAMILY HERALD AND WEEKLY STAR, together with THE QU'APPELLE PROGRESS and the premium plate may be secured for \$1.50 by remitting direct to this office.

—On Thursday, as Mr. Guy May, the freighter, was taking a big load out to the Fort, he undertook to lead a horse by hitching it to the hind wagon. The beast had some objections to being led this way and began to pull and plunge at a tremendous rate, and when near the nuisance ground succeeded in dislocating its neck and dying.

—Mr. Sanders tells the following joke against himself: It was last year shortly after the present proprietor had purchased the White-wood mill, when one of our business men driving along the trail in the direction of Whitewood and met

**Awarded Highest Honors—World's Fair.**

**DR. PRICE'S CREAM BAKING POWDER**

**MOST PERFECT MADE.**

A pure Grape Cream of Tartar Powder. Free from Ammonia, Alum or any other adulterant. 40 YEARS THE STANDARD.

**How the Dipper Saved the Farm.**  
Father was sick and the mortgage on the farm was coming due, I saw in the Christian Advocate where Miss A. M. Fritz of Station A, St. Louis, Mo., would send a sample combination dipper for 18 two-cent stamps, and I ordered one. I saw the dipper could be used as a fruit jar, a plain dipper, a fine strainer, a funnel, a strainer funnel, a sick room warming pan and a pint measure. These eight different uses makes the dipper such a necessary article that I went to work with it and it sells at very near every house, and in four months I paid off the mortgage. I think I can clear as much as \$2.00 a month. If you need work you can do well by giving this a trial. Miss A. M. Fritz, Station A, St. Louis, Mo., will send you a sample for 18 two-cent stamps—write at once. J. G. N.

ing a foreigner, asked how much he had got for his wheat that day. "Me only got 30c to-day," was the reply, "miller say he pay too much money before; he lost \$500." Then with a sly twinkle in his eye he continued, "Guess miller bought mill with the money him lost!"

—Mr. Charles McDougall, who has been on a protracted trip to the Dauphin region, returned home Tuesday. While breaking in a horse a few weeks ago Mr. McDougall had the misfortune to meet with an accident which might have terminated fatally. It seems the horse reared while he was on its back and fell over on top of him, breaking his leg and badly cutting his head. Medical aid was summoned from a distance (40 miles) and every assistance rendered him. Thanks to a kind Providence and a vigorous constitution, Mr. McDougall is able to be around today.

—Mr. R. L. Patterson, of Toronto, manager of the celebrated type-founding firm of Miller & Richards, Edinburgh, dropped in to see us last Friday on his way to the coast. He informs us that he is putting in a new plant for a paper at Yorkton, Assn. Mr. Patterson in his extensive travels has seen many curious sights and has many a funny story to tell of his experiences. The one which caused him most amusement happened not 100 miles from here. On entering a certain office he looked around for a moment but could discern nobody. Suddenly the snick of scissors caught his ear, and on closer observation saw, perched on a stool in a distant corner, the "devil," with his head through the middle of a newspaper and the editor performing a much needed operation. To an eastern man such a combination of business would no doubt seem strange, and the legend over the door: "Job printing and hair-cutting done here," would cause even Ben Franklin to sit up in his grave and stare; but such is life in the great Northwest.

**JUST LIKE HIS FATHER.**  
Adam: A smart boy is Johnson's son; quite a little man. Brown (who is not friendly to Johnson): Yes, he resembles his father, who is about as small a man as I ever met.—Texas Sifter.

**A CHURN THAT CHURNS IN ONE MINUTE.**  
I have been in the dairy business all my life and have many times churned for an hour before butter would appear, so that when I heard of a churn that would churn in a minute, I intended to try it. Every day for a week I used it, and not only could I churn in a minute, but I got more and better butter than with the common churn. This is very important information to butter makers. The churn works easily and will churn an ordinary churn in less than 60 seconds. I have sold two dozen of these churns within the past month. Every butter maker that has seen the churn in less than a minute bought one. You can obtain all desired information regarding the churn by addressing J. E. Casey & Co., St. Louis, Mo., and they will give you a prompt and courteous attention. A Dairyman.

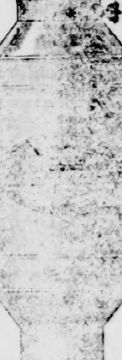

**WASHING SATIN.**  
When washing satin or any cotton goods with a satin finish, use borax water to restore the gloss. If you are washing black material you can prevent it fading by the addition of salt to the water.

**COMPLETELY KNOCKED OUT.**  
"I was so much run down, I had to give up work, and I felt as if life was not worth living," writes Wm. W. Thompson, Zephyr, Ont. "I took Scott's Sarsaparilla, and am now feeling as I did years ago." Scott's Sarsaparilla tones up the entire system, purifies the blood, and eradicates humors and scrofulous poisons. Ask for Scott's and get it.

**MARRIAGES.**  
MILES—COOPER—On the 4th inst., in St. Peter's pro-cathedral, by the Rev. J. P. Sargent, Mr. Ab. Miles to Miss Katie Cooper, all of Qu'Appelle.

**COOPER—THOMAS—**On the 4th inst., in the Pro-cathedral, Qu'Appelle, by Rev. J. P. Sargent, Mr. William Cooper, of Qu'Appelle, and Miss Martha Jane Watkins Thomas, of Devonport, England.

**Lyons' Fuel Saver & Heat Radiator**

Building  
Paper, Etc.,  
Lowest Prices

**Granby Rubbers**

It is no wonder that rubbers, which are not the same shape as the boot, should be uncomfortable. It costs money to employ skilled pattern makers but the result is a satisfactory fit. Each year new patterns are added, to fit all the latest shoe shapes, and Granby Rubbers are always "up-to-date." They are honestly made of pure rubber, thin, light, elastic, durable, extra thick at ball and heel.
